

Roman Vase with a Peach

This artwork captures the serene dialogue between form, light, and texture - a meditation on beauty and balance. At its heart, a finely modeled Roman vase in white clay stands dignified upon a carved wooden table, its intricate reliefs whispering of classical craftsmanship. A ripe peach, tenderly rendered, rests beside it - its warmth and softness contrasting with the vase's sculpted austerity.

Painted in the spirit of Academic Classicism, this work evokes harmony, restraint, and the enduring grace of the still life tradition.
